Prasun Adhikari

BCA Graduate | Front-End Developer | Full-Stack Developer

BCA graduate with hands-on experience in front-end development, web technologies, API integration, and AI-assisted software development. Skilled in React, TypeScript, JavaScript, Node.js, Express.js, MongoDB, and modern development tools. Experienced in building responsive web applications and AI-powered solutions, with a strong ability to learn new technologies, solve problems, and work effectively in collaborative environments.

Experience

2024 - 2025

Nexon Logistics

Front-End Developer

Worked on responsive web applications, API integration, debugging, testing, and UI improvements. Collaborated with designers and developers while using AI-assisted tools to improve coding efficiency and development workflows.

2025 - 2026

Software Technology Parks of India (STPI), Gangtok

Foundation Course on IoMT & Wearables

Completed training in IoT and wearable technologies and developed an IoT-based ECG Monitoring System using an Arduino Nano 33 board. Gained practical experience in hardware integration, technical documentation, testing, and IoT application development.

Projects

Nexon Logistics Website

Developed and improved a responsive logistics website, focusing on user experience, performance, cross-device compatibility, and modern web design.

Link: nexonlogistics.com

Paila – AI Travel Planner

Developed an AI-powered Nepal travel planner that generates personalized itineraries based on budget, duration, destination, and interests, with AI-generated travel recommendations, cost estimates, weather information, and interactive maps.
